

Fusión Pampa®

NUTRICIÓN Y SANIDAD ANIMAL

About Us

We are an organization created in 2002, that commercialize and distributes **high-quality products for the agricultural sector.**

Our mission is to contribute to the growth and development of Animal Nutrition and Health. To do this, we offer secure, consistent, and high-quality products, ensuring food safety.

This is how **Fusión Pampa®** was born and develops. Our belonging to the sector and knowledge, consisting of two decades of professional experience, is what commits us to prioritize **QUALITY** of our products and services.

We develop, manufacture, and commercialize our own high-quality products. In addition, we are exclusive distributors of **Carval®** for the swine and poultry industries throughout Argentina. This strategic partnership allows us to offer products of excellence and improve the quality of production and animal welfare. We also distribute **Ceetal Laboratoires®** products for disinfection and cleaning of facilities.

Personalized service and respect to our customers are added values that create our company's philosophy.

Creating Value

In **Fusión Pampa®**, we ensure reliable, consistent and high-quality products by certifying our plant under **IRAM 14108** of Food Safety and Good Manufacturing Practices (GMP). This regulation refers to the conditions and practices that preserve food quality to prevent contamination and diseases that could be transmitted by its consumption.

Fusión Pampa® has always been able to successfully overcome the difficulties of the country and the industry.

CERTIFICADO INOCUIDAD ALIMENTARIA »

Committed

.To the past

by learning what we have experienced since our foundation more than 20 years ago, and as our name expresses: fusing our ideas and productive realities.

.To the present

thanks to our human capital that supports our customers in their establishments and businesses.

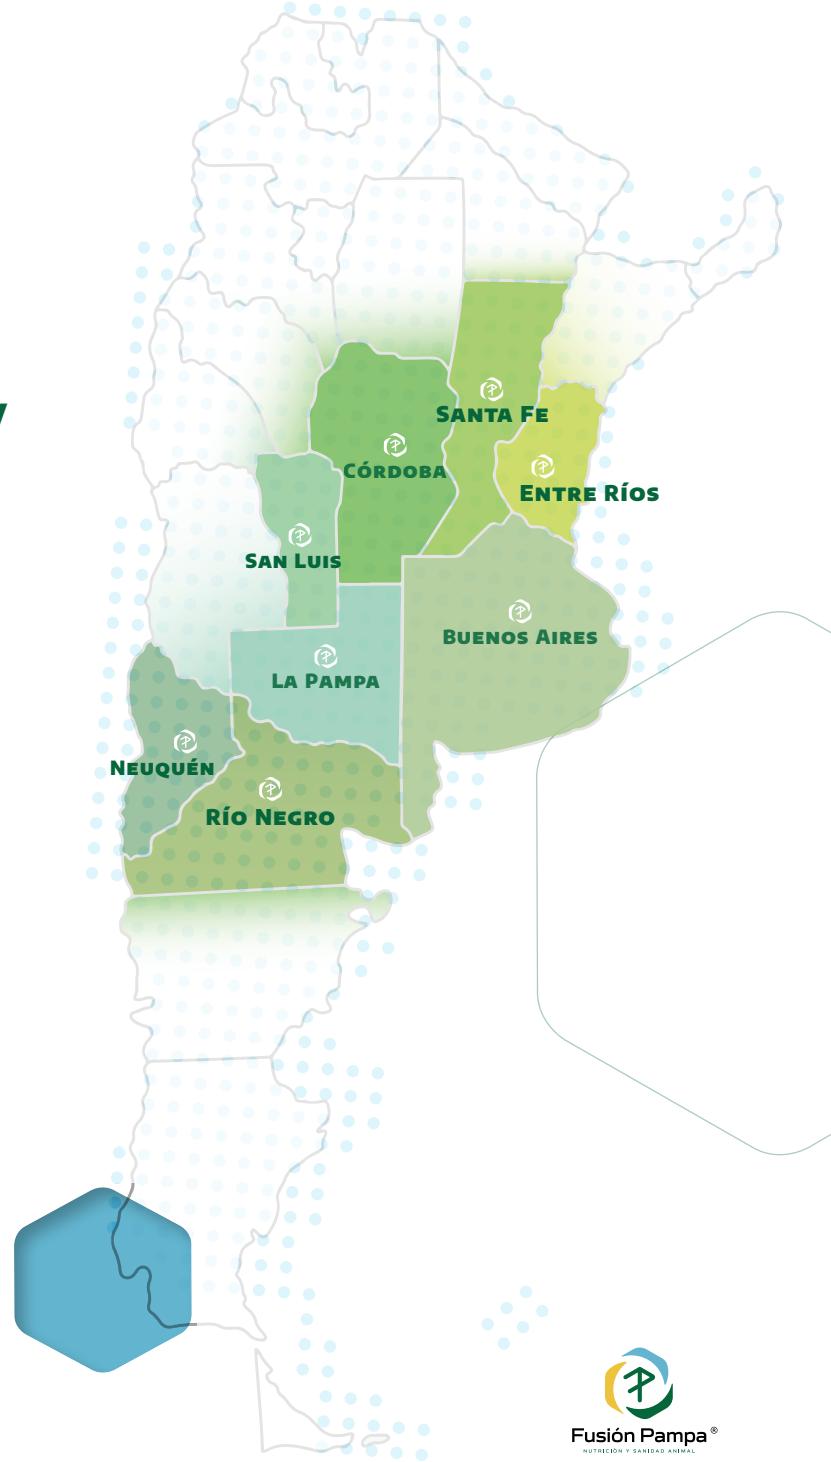

.To the future

by pursuing new ideas and incorporating new technologies to our processes without forgetting sustainability, which is absolutely necessary today.

Present

In Fusión Pampa®, we engage actively in the commercialization of our line of products throughout Argentina, especially in the Pampas.

What we offer

Meal and Diet Plan/ Formulation and Elaboration Services

Diets formulated by expert nutritionists for each species according to the needs of the different productive stages.

Mixing Plant Optimization/ On-farm Mixing Control Service

We ensure the correct mixing of ingredients distributing them homogeneously throughout the feed.

Technical assistance in the field for each species and production/

We have outstanding professionals in each productive area: Layers/ Broilers/ Swine/ Beef Cattle/ Dairy Cows

Borescope Inspection in the fields/

We examine the internal conditions of tubes and mechanisms for water and soluble products conduction.

Plant Auditing/

Technical service in the fields to meet the needs of farmers regarding the processing of products involved in food manufacturing.

Laboratory Services and Ingredient Analysis Service/

We perform physicochemical quality assurance of raw materials and finished foods oriented to the ingredients we use in our manufacturing plant as well as available to our customers.
